

It is a reality that in many occasions we can not fill a tank or a mixer without a previous cleaning, For the simple fact of not using the same material used previously. Therefore we have designed a high-pressure washing system for the cleaning of machinery. Two types of cleaning can be done; Automatic, by means of pressurized water jets Cycle through rotary or manual heads, in which an operator with a lance is cleaning the inside of the cubicles.

 *Environmentally friendly product, allows the reuse of water.*

Due to its robustness and versatility it allows wide application in the sector of:

**Concrete/Prefabricated
Chemical
Refractory
Chemical fixation/
Environment**

Made for optimal cleaning with multiple rotation by reducer motor

More common application
MIXERS

More common application
TANKS

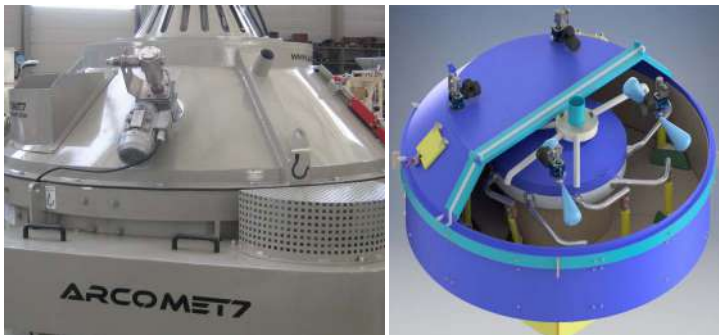

**Rotary head
RH-400**

**Rotary head
RH-550**

MIXERS

- ✓ Use of cleaning water for the kneading.
- ✓ Saving cleaning times.
- ✓ Increases production capacity.

TANKS

Opción:  ATEX22

- ✓ Increases safety, cleanliness and productivity of tanks and propellers.
- ✓ It reduces maintenance time of and operating costs.
- ✓ Reduces costs in water and chemical use.

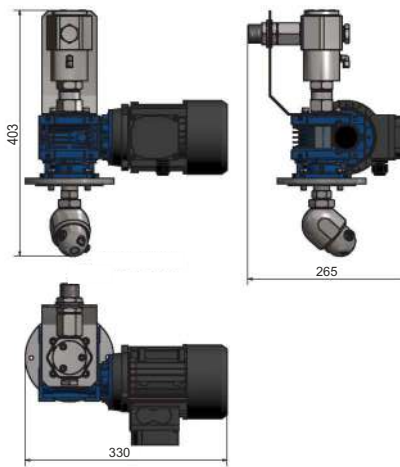

MODELOS / CABEZALES

		2	3	4	5	6
VOLUME	L/min	40	40	40	40	40
BOROMETIC PRESSURE	bar.	100	100	100	100	100
SUPPLY PRESSURE	bar.	3-5	3-5	3-5	3-5	3-5
SUPPLY PRESSURE	Kw	11 Kw				
ROTARY HEAD ENGINE	Kw	0.18 Kw				
POWER SUPPLY VOLTAGE	VAC	400 VAC - 50/60 Hz				
ELECTROVALVULES VOLTAGE	VAC	110 VAC (Other tensions)				

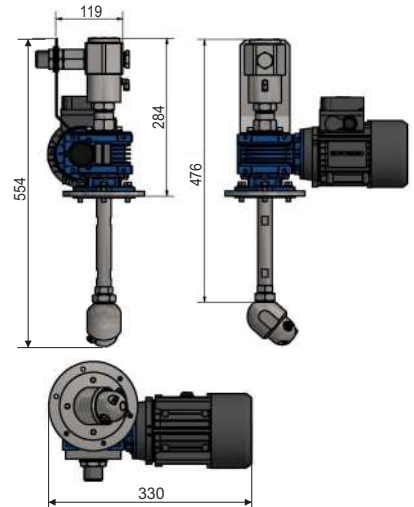

MEASUREMENTS

RH-400

RH-550

AUTOMATION

AE-9220P.SL equipment designed to control and Monitor the washing system.

- ✓ Allows continuous visualization of the cycle process cleaning.
- ✓ The cycle is perfectly integrated into the operating logic of the installation.

ARCO LAV MIX SOFTWARE

Program to visualize the process of a PC of the washed system.

- Features:
- Time control.
 - Alarms.
 - State cleaning system.
 - System cleaning cycle.
 - Control marcha - paro.

Possibility of integration with the software dosage: Arco Gold Two.
